CLIMBING ROSES

 American Beauty, white

Our climbing American Beauty is the old-fashioned American Beauty that has the long stems and blooms throughout the summer.

All of our roses are western grown and are therefore hardy and will bloom throughout the summer unless the season is unusually dry. Get western grown roses for hardiness.

We only handle the No. 1 and Jumbo sizes as the smaller sizes do not give satisfaction in a large number of cases.

Trees taller than 4 feet cannot be shipped by mail but will be shipped by express, charges collect. Be sure to give express office nearest you. Express paid if your order amounts to \$10.00, except when special price is quoted on large orders. Orders for more than 10 trees make package too large to go by mail.

If you wish larger quantities of peach or pear trees, write for special prices.

Tree roots grow during the winter months, so a tree will be in better condition for the next growing season if it is planted early in the dormant season.

We have small quantities of other nursery stock too small in amount to advertise. If you do not see what you want write us. We can probably furnish it at a saving to you.
